

### **Food Machine Parts**

You can rest assured to buy customized Food Machine Parts from Hanlinrui. We look forward to cooperating with you, if you want to know more, you can consult us now, we will reply to you in time! There must be a lot of supplier, but we are special and be trust from you.

### **Product Description**

Our factory specializes in manufacturing of Food Machine Parts, Founded in 2017, Qingdao HANLINRUI Machinery is a professional machinery company in the coastal city of Qingdao. Our business is involved in the manufacturing of machinery parts, standard parts, customized parts, and manufacturing of non-standard equipment parts., as one of the professional China Food Machine Parts manufacturers and China suppliers, we are strong strength and complete management. Also, we have own exporting license. We mainly deal in making a series of Food Machine Parts and so on.

### **Our CNC machining capabilities**

Qingdao Hanlinrui Machinery Co., Ltd.

E-mail: [sales@hlrmachining.com](mailto:sales@hlrmachining.com)

We operate almost every kind of CNC mill and turning center, and pride ourselves on being able to machine whatever you need, from simple, 'as-machined' workholdings to complex, organic geometries with tight tolerances. On request, we can also produce parts with EDM and grinders. Build envelopes, minimum feature sizes and design guidelines vary for milling and turning. Click through to see our full capabilities.

### **Maximum capabilities for CNC turning**

Part size limitations	Metric units	Imperial units
Maximum part diameter	431mm	17in
Maximum part length	990mm	39in
Maximum swing over the carriage	350mm	13.7in

Maximum speed:1700PRM

Motor power:640W

### **How much does CNC machining cost?**

Prices start around \$65, but vary based on complexity, quantity and lead time. The best way to find out is to submit a 3D CAD model and get an interactive quote with design for manufacturability (DFM) feedback. Because we use proprietary software and automated fixturing processes, there are no up front non-recurring engineering (NRE) costs. This makes purchasing quantities as low as 1 to 200 parts cost effective. Prices compared to 3D printing are comparable to somewhat higher, but machining offers improved material properties and surfaces.

### **What is CNC milling?**

CNC milling is a machining process that utilizes computerized controls to manage the movement and operation of multi-point rotary cutting tools. As the tools rotate and move across the surface of the workpiece, they slowly remove excess material to achieve the desired shape and size.

### **What is a CNC turning?**

CNC Turning is a manufacturing process in which bars of material are held in a chuck and rotated while a tool is fed to the piece to remove material to create the desired shape.

Hanlinrui Machinery is a professional Food Machine Parts manufactures and Suppliers from China Food Machine Parts Factory. Our professional expertise in manufacturing Food Machine Parts has been honed over the past 10+ years.

If you want quotation, you can ask us by leaving a message. We will get back to you as soon as possible.
